## a little about ...

Gonona Technologies Limited is a platform where we are developing multiple ideas for the IT industry. We truly believe implementing the projects and the innovative ideas we have on our hand will make everyone's life easier, every day.

Along with developing and implementing innovative business ideas, we provide high-tech industry standard solutions in the field of information, communication, defense, and surveillance technologies.

Technology is our passion. For every solution we provide, and every project we implement; we go the extra mile because working with technology is more than just our daily job.

## the BIG picture...

We are more than a technology company thriving to make profit. Our motive to be the best has far more meaning than just coming on the cover picture of magazines and newspapers. We believe benefit of technology should available to everyone in this world regardless of race, nationality and affordability. We dream of a world where everyone has access to information. We are working constantly for a world where people can communicate with one another and no one has to be apart, even for community with moderate resource and income.

Our promise to the society is to gift technology that makes life easy. As part of corporate social responsibility, we invest a percentage of our profit in developing technology that can be used by the rural community to develop its lifestyle. R&D is at the heart of innovation and it creates new technology and new products and service which results in a community with better living standards.

# Digital Device Production Consultancy

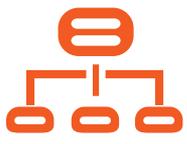

---

We provide turnkey solution for setting up digital device production lines in any location. We have a strong team with solid understanding in finance and technology along with long experience in sourcing CKD or SKD components of digital devices. We provide the full solution for starting laptop, tablet, and other device production, providing from project planning, financial estimation, risk management, vendor selection, production consultancy, branding, marketing, and right down to supply chain management.

## Case Study

With Gonona's vision and consultancy, Telephone Shilpa Sangstha (TSS) was able to successfully deploy a laptop assembly plant in Dhaka, Bangladesh which produced over 80,000 laptops at an amazingly affordable price. In addition to being the first laptop to be produced in Bangladesh, "DOEL" served a great deal to reduce the digital divide in Bangladesh by making laptop more of a household device rather than a luxury.

# High Tech System Integration

---

Whether you have existing systems that should work together or about to get into a project that requires different technologies from different vendors to be integrated; we are the right company for you who can get the job done. We have a team of talented experts specializing in numerous fields, who can integrate just about any systems together. We love technology, and nothing is more satisfying than seeing a project consisting of many technologies run as one system.

## Case Study

We have helped Prime Minister's Office, Bangladesh establish a highly secured surveillance system integrated with a centralized video storage system which is equipped with intelligent video analytics. Our solution allows the PMO, Bangladesh to monitor all its activities from one place, store all the CCTV footages centrally and backup the data periodically on more than a few servers.

# Intelligent Software Development

We provide scalable set of cost-effective business management solutions which accelerates the growth of your organization by delivering lasting benefits and reducing overall IT overhead cost. Along with providing pre-built functionalities, we are able to provide customized solutions to ensure our application fits in your organization perfectly while adapting to your unique requirements. We believe your business applications should not limit your business, your business structure and nature should grow or change in respect of your drive.

## Case Study

Yang Min Technologies Limited, a large sized sourcing agency based in Shenzhen, China needed to manage and keep track of their large trading business. Without an automated ERP and CRM their daily operation was spiraling out of control, and their clients were facing poor service. We have installed our ERP and CRM solution and integrated it to their system with customization to make it a success.

# Security, Surveillance, & Defense Consultancy

---

We provide multi-disciplined security and defense consulting services that enables sensitive public and private sectors to operate and function with authority. Our team consists of retired military personnel from the highest level, and they combine technical security knowledge and operational security experience, gained in a wide variety of countries and cultures, to deliver the best solutions to you. We promise to provide solutions that will prevent potential threat of crime and terrorism and help your organization put authority on the map.

## Case Study

Port Of Chittagong is the largest seaport in Bangladesh. Gonona Technologies Limited has been providing Chittagong Port Authority (CPA) with full consultancy in the field of security, system integration, and information technology since 2010. With our help, CPA has installed many innovative security and IT solutions to streamline the port to maximum efficiency.

# Fiber Optics Network Deployment

Gonona provides cost effective last mile connectivity solutions that are not only versatile and reliable, but also highly robust and environment friendly. Combining ease of use and rapid deployment by small, highly efficient crews using inexpensive construction equipment, we change the way fiber optic networks are deployed for last mile applications. Furthermore, our innovative Vertical work changes the way fiber optic networks are deployed - reducing costs, maximizing versatility and minimizing environmental impact.

## Case Study

Summit Communications Ltd (SCL) is a new initiative within the Summit Group having NTTN (Nationwide Telecommunication Transmission Network) and ITC (International Terrestrial Cable) Licenses. We provide full network deployment and maintenance support in Chittagong region for SCL. So far, Our work includes Overhead and underground Cable Blowing of 2,58,500 meters and network maintaining of 380,000 meters to ensure 3G and 4G connectivity in Bangladesh.

# High Stake Web Project
